## Odor Removal Services

### Been away for a while? Is your home stale or musty smelling?

Are you a Snowbird that spends part of the year away from Florida? Have you come home to a stale, musty smelling home? When the air conditioning has been set high, and the place has been sealed up for weeks or months, if it's a rental, previous guests may have left behind odors. You earned your life-style and you want to enjoy it. **As a part-year guest you should live in a home that is comfortable and fresh smelling.**

*"Our condo had a stale, musty smell. The hydroxyl treatment made it smell fresh again"*

- 1.** Green solution; no chemicals or solvents.
- 2.** No residue, no special set-up conditions.
- 3.** Safe for people, pets, plants, furnishings.

## The smart, green way to freshen indoor air.

The OHdor Gone Odor Removal Service by Alidade MER uses atmospheric hydroxyl radicals (AHRs) to destroy odors quickly and effectively. Hydroxyl radicals are naturally occurring outside on a sunny day. They are responsible for cleaning the atmosphere of many pollutants; they're known as nature's broom.

Our equipment simply mimics nature's process. We move room air through multiple UV frequencies. No other chemicals or consumables needed. The equipment runs on common 115v electric outlets.

Most odors are VOC molecules. Smoke (cigars, cigarettes, cannabis), pet odors, lingering food odors, etc. are VOCs. The musty odor from high humidity is a VOC. Many people are sensitive to fragrances, fumes from new carpeting, etc.

### What is the process?

We evaluate the location to determine the type and number of equipment needed. We estimate the duration for the treatment. Once accepted, we deliver and set up the equipment. Treatments typically last between 1 and 2 days, depending on the situation. Once completed, we remove the equipment. Cost varies depending on the situation but is typically \$150 per day.
