

# OHdor Gone Odor Removal Services

## Smoke, pets, mustiness and other odors can impact room sales

Hotels and vacation rental property managers provide comfortable and clean lodging experiences. Sometimes, guests may disregard rules. They may smoke in rooms. Pets may 'misbehave' on the carpet or furniture. Excessive humidity can create a musty smell. There may be perfumes or fragrances left behind that irritate other guests. New carpeting has been installed and guests complain of the odor. **As a hospitality professional you know these issues can lead to bad reviews, fewer bookings and result in lost revenues.**

*"It's incredible! No preparations, no labor. Just run the machine and the odors are gone."*

- 1.** Green solution; no chemicals or solvents.
- 2.** No residue, no special set-up conditions.
- 3.** Safe for people, pets, plants, furnishings.

Daily Services, or  
Month Lease Service

## The smart, green way to permanently remove odors.

The OHdor Gone Odor Removal Service by Alidade MER uses atmospheric hydroxyl radicals (AHR) to destroy odors quickly and effectively. Hydroxyl radicals (OH•) are naturally occurring outside on a sunny day. They destroy volatile organic compounds (VOCs) that are emitted into the atmosphere. AHR technology developed by NASA cleansed the air on the Space Shuttle and the International Space Station.

Our equipment simply mimics nature's process. We move room air through multiple UV frequencies. No other chemicals or consumables needed. The equipment runs on common 115v electric outlets.

Most odors are VOC molecules. Smoke (cigars, cigarettes, cannabis), pet odors, lingering food odors, etc. are VOCs. The musty odor from high humidity is a VOC. Many people are sensitive to fragrances, fumes from new carpeting, etc.

### What are the service options?

We offer two options; Alidade MER provided service or equipment lease service. If Alidade MER service is preferred, we evaluate the job and determine the type and number of equipment needed. We estimate the duration for the treatment, deliver and set up the equipment, treat the room(s) and remove the equipment. The lease option is great when there are recurring odor issues. We supply the equipment, train your staff on how to use and care for the equipment. We replace components or repair equipment if/when needed.
